Seeking to leverage strong programming skills and project experience in a dynamic organization. Committed to delivering innovative solutions and enhancing operational efficiency while contributing to team success and achieving company goals

Academic Details

Degree	Institution	Year	Percentage
MCA	Pimpri Chinchwad College of Engineering	2025	74.96%
BCA	Dr. D. Y. Patil College, Pimpri	2023	89.35%
PGCP-MC	C-DAC ACTS – Sunbeam Institute of Information Technology, Hinjewadi, Pune (Post Graduate Certificate Programme in Mobile Computing)	2026	In Progress

Certifications

- **Post Graduate Certificate Programme in Mobile Computing (PGCP-MC)** – Centre for Development of Advanced Computing (C-DAC), Advanced Computing Training School (ACTS), a scientific society under the Ministry of Electronics & Information Technology (MeitY), Government of India.

Core Competencies

Category	Skills
Programming	Core Java, Basic Spring Boot, Python, C, C++, Node.js, React Native, Expo, Swift, Kotlin (Basic)
Scripting Languages	Shell Scripting
Web Technologies	HTML, CSS, JavaScript
Databases	MySQL
Version Control	Git
IDEs/Tools	Visual Studio Code, Eclipse
Soft Skills	Strong analytical skills, Effective communication, Teamwork, Problem-solving, Adaptability

Internship Experience

Java Full Stack Developer Intern

Maxgen Technologies Pvt. Ltd.

From: 05 Jan 2025 – To: 15 Mar 2025

- Successfully completed a project under the guidance and technical support of senior developers.
- Worked on full-stack development using Java technologies.
- Demonstrated sincerity, hard work, and full dedication throughout the internship.
- Gained practical exposure in software development and team collaboration.

Academic Projects

Digital Polling System

Overview: Developed using Core Java, HTML, CSS, and JavaScript, an online voting platform was created with the goal of guaranteeing electoral efficiency and transparency. Secure voter registration, candidate management, and real-time vote counting are now possible thanks to the implementation of role-based access for voters, candidates, and administrators. The system keeps audit logs for transparency and uses a one-vote-per-user model to stop fraud.

Key Features:

User Authentication: Implemented secure login validation using JDBC for database connectivity.

Fraud Prevention: Used distinct voter IDs to enforce a one-vote-per-user system.

Notifications: Automated email and SMS alerts for election-related updates have been integrated.

Data Integrity: Maintained audit trails to guarantee transparency and accountability.

Database management: For effective data storage and retrieval, MySQL with JDBC was used. Utilized technologies include MySQL, HTML, CSS, JavaScript, JDBC, and Core Java.

Web-based E-commerce Management System

Overview: Created using Core Java, Node.js, HTML, CSS, and JavaScript, an interactive e-commerce platform was created to give customers a flawless online shopping experience. Through specialized user and admin modules, the system facilitates safe customer transactions and effective product management.

Key Features:

Customers could browse products, put items in their shopping carts, and make safe purchases thanks to the customer module.

Admin Module: Enabled administrators to effectively track orders, manage product listings, and keep an eye on inventory.

Real-time Updates: Dynamic interfaces were put in place to give immediate feedback on the status of orders and carts.

Database Management: To handle product, user, and transaction data, MySQL with JDBC was used.

Utilized technologies include MySQL, HTML, CSS, JavaScript, Express.js, Node.js and Core Java.

Office Space Rental and Purchase Platform (Android + Spring Boot)

Description: Developed an end-to-end platform that enables the owner to post the office space for rental and purchase whereas the buyer and the tenant can explore the listings and make requests accordingly. Developed the Android front-end and integrated it to a Spring Boot back-end having a REST API with the help of MySQL database.

Features:

- Developed the Android application using Java language having user-friendly interface.
- Incorporated role-based login for Owner, Buyer, and Renter along with security features of authentication.
- Integrated the application with the REST APIs developed using Spring Boot.
- Enabled listing, viewing of images, and application and request submission for properties.
- Had management for users, properties, applications, and transactions using MySQL.
- Provided secured access to API using JWT based authentication.
- Technologies Used: Java (Android), Spring Boot, MySQL, JWT, REST APIs.

Simple iOS To-Do App (Swift)

Overview: Developed a basic iOS To-Do application using Swift to understand fundamental iOS development concepts.

Key Features:

- Add and display simple tasks using a basic iOS interface.
- Used basic UIKit components and Swift concepts for user interaction.
- Technologies Used: Swift, iOS, UIKit.

Extra Curricular Activities

Competitions: Actively participated in the Technofusion Code Buzz competition during BCA, showcasing coding skills and competitive spirit.

Workshops/Seminars: Attended workshops on emerging technologies and software development practices to enhance technical knowledge.

Declaration

I hereby declare that all the above mentioned information is true to the best of my knowledge and belief.
