

Basic Information

Name : Vedant Anil Chaudhari

CCPP ID : PW0072

Course : PGCP-MC, Feb26

Address : C44, Navshantiniketan Society, Near Akurdi Railway Station,
Sector no. 29, Nigdi, Pradhikaran, Pune, Maharashtra, Pune,
MAHARASHTRA

PGCP-MC Marks

S.NO.	Module	Maximum Marks (Theory)	Obtained Marks
1	OS Concepts and Linux programming and Introduction to DBMS	40	24
2	Object Oriented Programming with Java	40	23
3	Algorithms & Data Structures Using Java	40	25
4	Mobile Programming	40	31
5	Web-Based Java Programming	40	28
6	Hybrid Mobile Apps Programming	40	27
7	AI on Mobile Platforms	40	39
	Total	280	197

Academic Details

Level	Stream	Institute	Board/University	Passing Year	Degree %	Division
MCA	Computer Applications	Pimpri Chinchwad College Of Engineering	Savitribai Phule Pune University	2025	74.39 %	I
BCA	Computer Applications	Dr. DY Patil Institute of Technology, Pimpri	Savitribai Phule Pune University	2023	84.93 %	I
XII	Science	Dr. D.Y. Patil Arts, Commerce & Science College, Akurdi	Maharashtra State	2020	49.38 %	II
X	General	Jnana Prabodhini Navanagar Vidyalaya	Maharashtra State	2018	65.00 %	I

Academic Projects

Title : SpaceHub AI Powered Rental Management System

Platform : Full Stack Web & Mobile Application
Development using Spring Boot, React,
Android and MySQL

Duration : 1 Month

Description : An AI-driven Property Rental Management System has been created with Spring Boot, React, Android, and MySQL. It has an AI property search engine, a system that lists properties, manages bookings, provides secure methods of online payment, and offers role-based access authentication. In addition, the system has a central administration unit and features REST API that integrates the web application and mobile app.

Project Repository : <https://github.com/vedant14c/SpaceHub-AI-Powered-Rental-Management-System.git>

Title : Web based E commerce platform

Platform : J2EE

Duration : 3 Months

Description : Developed an interactive web-based e-commerce platform with dedicated Customer and Admin modules to deliver a seamless online shopping experience. The customer module supports product browsing, cart management, and secure purchases, while the admin module enables order tracking, product listing management, and inventory monitoring. Dynamic interfaces provide real-time feedback on order and cart status. MySQL with JDBC was used as the backend for efficient handling of product, user, and transaction data.
